GNIVING THE S

THERMAL SHOP

This catalog highlights Thermal Shop's expansion beyond insulation into professionally installed storage and shelving solutions. While insulation remains a core part of the company's foundation, shelving and organization systems have become an established service for builders and homeowners. These solutions bring the same focus on quality installation, efficiency, and practical design that defines Thermal Shop's work.

THE FASTTRACK	DESCRIPTION
---------------	-------------

DESCRIPTION

Transform your garage into a highly organized, functional space with the endlessly configurable Rubbermaid® FastTrack® Garage Storage System. Designed to help you reclaim your floor space, this heavy-duty system utilizes the space between your wall studs to store up to 10X more than traditional floor shelving.

GARAGE SHELVES

Our garage shelving system features durable gunmetal silver TightMesh™ wire shelves designed for strength, flexibility, and everyday garage storage. Each shelf safely supports up to 350 pounds and mounts to adjustable brackets on the FastTrack® rail system, allowing shelves to be easily repositioned as storage needs change.

OUR OFFERINGS

Garage Shelving

Our garage shelving provides strong, open storage for bins, tools, coolers, and seasonal equipment. Built with durable gunmetal silver TightMesh™ wire and mounted on adjustable FastTrack® brackets, shelves can be easily repositioned along the rail as storage needs change. Shelves are available in 16-inch and 20-inch depths to accommodate a wide range of garage items while keeping the floor clear and organized.

FastTrack® Hook Storage

The FastTrack® hook system keeps long-handled tools and bulky equipment neatly organized on the wall. Heavy-duty steel hooks attach directly to the FastTrack® rail and can be moved or rearranged in seconds. This system is ideal for storing shovels, rakes, brooms, ladders, extension cords, and yard tools, helping maximize wall space and maintain a clean garage.

Ball & Toy Storage

Our ball and toy storage shelves help keep sports equipment and kids' gear contained and easy to access. Built with a durable wire frame and flexible bungee cord retention, they securely hold basketballs, soccer balls, and other oversized items. Units are available in 16-inch and 20-inch depths and mount directly to the FastTrack® rail system to keep gear organized and off the floor.

Available Depths:

20"

SUMMARY

Thermal Shop's garage storage solutions are designed to turn unused wall space into practical, organized storage. Our system includes adjustable wire shelving in 16-inch and 20-inch depths, a versatile FastTrack® hook system for hanging tools and equipment, and ball and toy storage shelves that keep sports gear contained with flexible bungee retention. Together, these options provide a clean, adaptable setup for organizing tools, storage bins, and everyday garage items.

WIRE SHELVING

Our wire shelving systems provide a versatile and durable storage solution designed for closets, pantries, and general household organization. Built with coated steel wire for strength, these shelves are available in multiple spacing styles and depths to accommodate everything from clothing and linens to pantry goods and everyday storage.

LINEN

Linen shelving features wider spacing between the wires, making it well suited for storing towels, bedding, and other folded linens. It is commonly used in linen closets, clothing closets, and for organizing shoes.

Available Depths:

12"

16"

TIGHTMESH

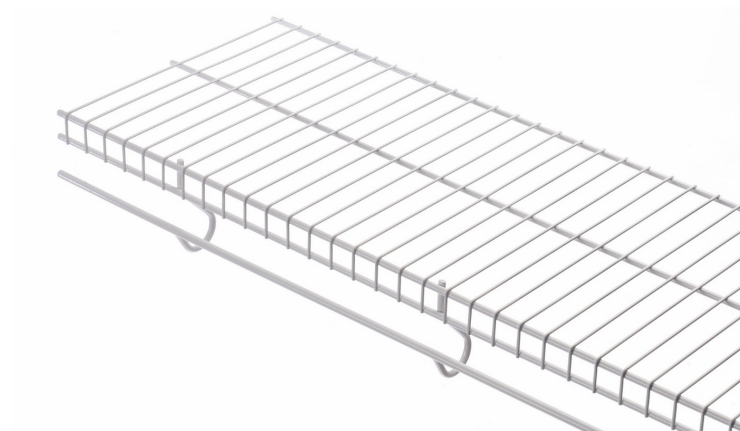

TightMesh™ shelving uses a tighter wire pattern that provides better support for smaller items. This style works well for pantries, closets, and general household storage where added stability helps keep items organized.

Available Depths:

12"

16"

20"

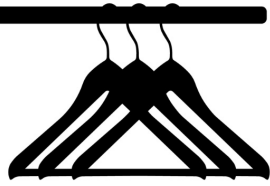

FREESLIDE

The FreeSlide™ shelf includes a built-in sliding rod beneath the shelf that allows hangers to move freely along the bar. This design combines shelf storage with convenient hanging space for clothing in closet applications.

Available Depths:

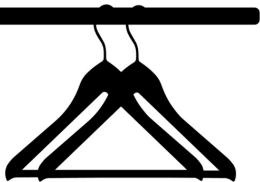

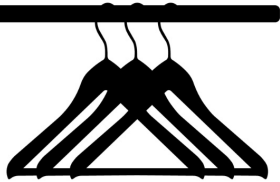

12"

STANDARD

The Standard package offers a simple closet layout with a single FreeSlide™ shelf and hanging rod, creating one continuous hanging section. It is ideal for basic clothing storage and works well in smaller closets.

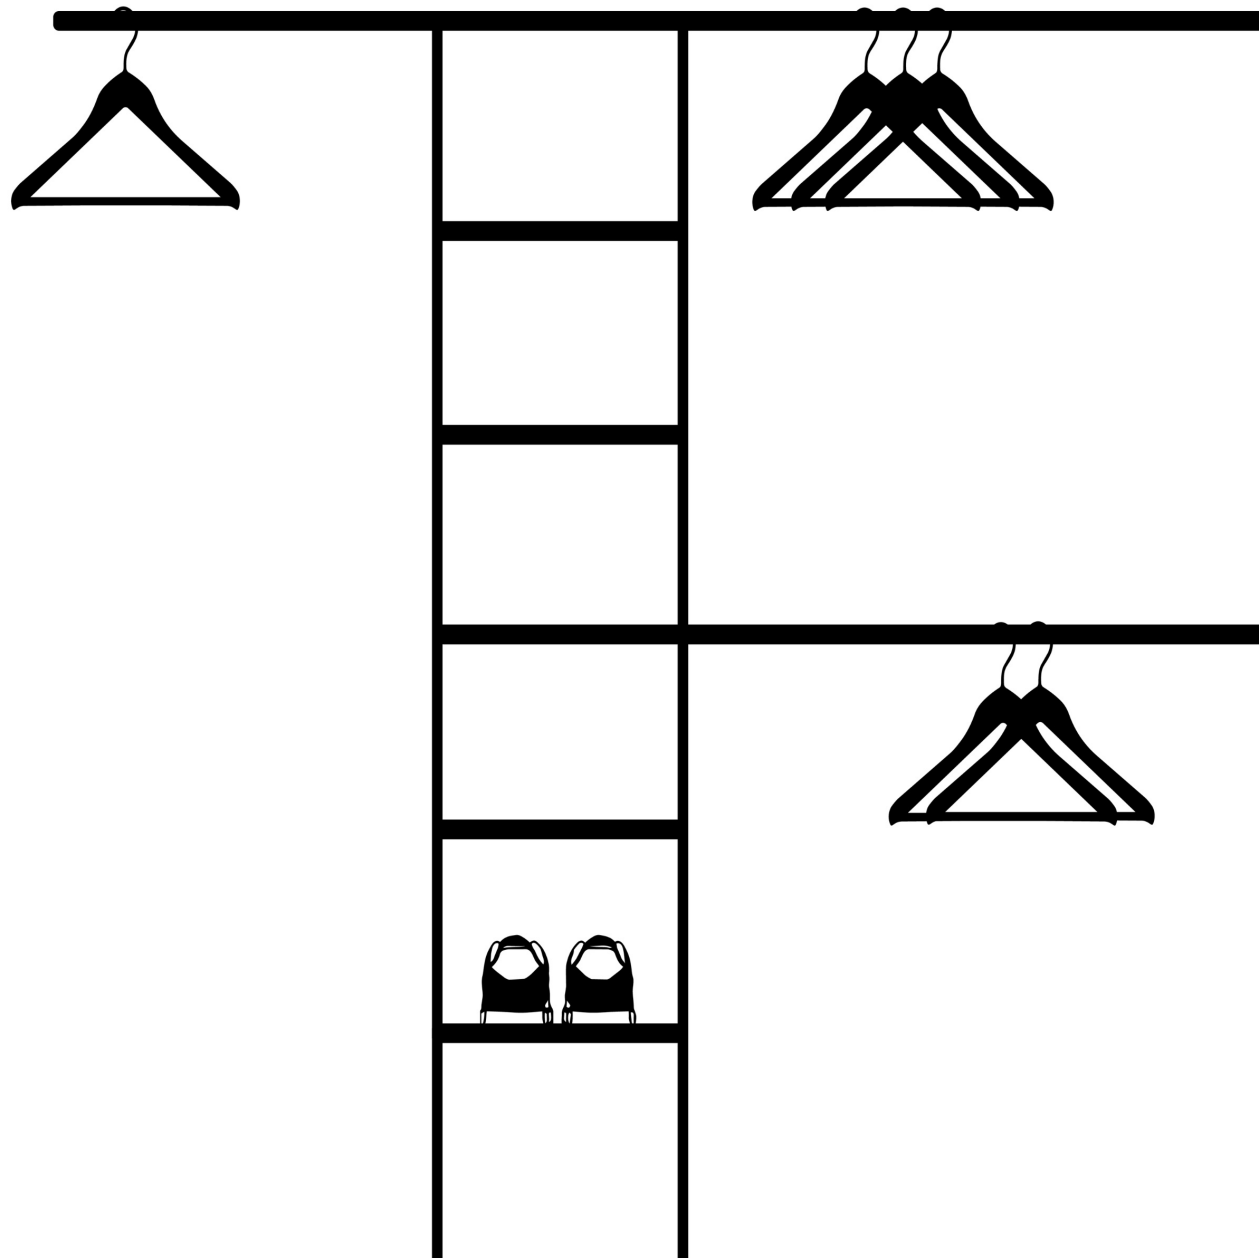

ENHANCED

The Enhanced package includes two FreeSlide™ shelves, creating a long-hang section along with two shorter hanging areas below. This layout provides a balanced mix of long and short garment storage.

PREMIUM

The Premium package provides the most versatile layout, combining a long-hang section, a central shelving stack, and a double-hang section for shorter garments. The center stack creates dedicated storage for folded clothing, shoes, or accessories, while the double hang maximizes hanging capacity. This configuration delivers the highest level of organization and storage efficiency.

ADJUSTABLE STORAGE SHELVING

DESCRIPTION

Available Depths:

16"

20"

Designed for flexibility and long-term organization, this shelving system mounts to a vertical 84-inch steel track that allows shelves to be repositioned as storage needs change. Durable brackets support the shelves and can be moved up or down the track to adjust spacing between shelves. The track can also be cut to fit when a shorter installation is needed, making it adaptable to a variety of closet and storage layouts. Our shelves provide dependable storage for folded clothing, bins, pantry items, and general household organization.

SUMMARY

Our adjustable shelving system uses vertical tracks and movable brackets to create a customizable storage solution that can be easily repositioned as storage needs change. This system provides durable and adaptable organization for closets, pantries, and storage spaces.

CUSTOM LAMINATE

Custom laminate shelving creates a built-in storage system designed for a clean, finished closet appearance. The system combines durable shelving, hanging sections, and configurable layouts to maximize organization and functionality within the space.

THE THERMAL SHOP WAY

LONG HANG

A long-hang section provides space for longer garments such as dresses, coats, and robes. An upper cubby shelf above the hanging section adds convenient storage for folded items, bags, or seasonal pieces while keeping the space organized.

DOUBLE HANG

The double-hang configuration maximizes hanging capacity by creating two levels of hanging space within the same vertical area. This layout is ideal for shorter garments such as shirts, pants, and jackets, helping make the most efficient use of closet space.

STACK

Stack shelving offers a vertical section of adjustable shelves designed for folded clothing, shoes, or storage bins. The number of shelves can be selected based on the storage needs of the space, allowing for flexible organization.
